

SSGOA - Summit Senior Golf - 2026 Player / Division

SSGOA GSIndex cutoffs by Division: A Division up to 13.7; B Division 13.8 – 19.6; C Division 19.7 & over

SSGOA GSIndex is calculated using up to 10 scores. The matrix below shows how many scores are used. You can see that some high scores AND some low scores are discarded from the SSGOA GSIndex calculation, which leaves something close to a rolling average. This is different than a GHIN index, which uses only the best scores in the calculation. Typically, your SSGOA GSIndex will be 2 to 6 higher than your GHIN index, if you use GHIN.

Players can move up 1 Division to play tournaments, from B to A or from C to B, but only if their partner is already in the higher Division based on GSIndex cutoffs. This means that a C Division player cannot move up to play in the A Division.

Players cannot move back to a lower Division once they have played a tournament in the higher Division.

Your GSIndex is NOT your handicap. Your course handicap will vary for each tournament, based on the slope, course rating, and par for the tees specific course / tee combination being played. Course handicaps will be used for team flighting in gross score events (scrambles, best ball, etc) and will be used for team flighting and results calculations in net score events. Skins always use gross team hole scores.

How GSIndex is calculated

Percent % figure

Number of scores GSIndex based on

Minimum number of scores needed before an GSIndex can be calculated
